

SILKOLENE CLEANERS & DEGREASERS

SILKOLENE BRAKE & CHAIN CLEANER

SILKOLENE BRAKE AND CHAIN CLEANER helps maintain the efficient operation of brake and drive systems by removing dirt, dust, grease, oil and brake fluid from brake discs, callipers and drums, and efficiently removing heavy residues and deposits from chains. For brakes, spray directly onto affected components, and re-assemble after drying, use adequate ventilation. It is specially formulated to remove persistent brake pad dust, preventing "brake squeal" and "chatter" and is also suitable for precision degreasing of metal parts, leaving NO oily film. The non-chlorinated solvent can be used on all drive chains on motorcycles, ATVs, karts, cycles, etc. Spray onto the chain and allow to soak in. Agitate with a brush or a cloth and then allow to dry. It is strongly advised that chains are lubricated shortly after cleaning, with a FUCHS SILKOLENE Chain Lubricant.

SILKOLENE CARB CLEANER

A selected blend of solvents which is designed to remove gum and resin build-up from carburettors, fuel injection systems and automatic chokes, allowing smoother operation and improving engine efficiency. Start engine with the air filter removed. With the throttle set at quarter to half open, spray cleaner into air intake until the engine begins to stall. Cease spraying and refit the filter. SILKOLENE CARB CLEANER is also suitable for cleaning throttle linkages and carburettor bodies.

SILKOLENE CONTACT CLEANER

A powerful solvent designed to clean components with the minimum of fuss, leaving no residual film. Its vigorous penetration and quick drying action makes SILKOLENE CONTACT CLEANER perfect for cleaning fouled plugs, dirty points and other precision parts. Simply spray onto parts to be cleaned and allow to dry off. SILKOLENE CONTACT CLEANER is ideal for cleaning suspension and engine components during assembly, thereby ensuring maximum Component.

SILKOLENE WASH-OFF

An entirely new cost-effective spray-on / hose-off bike cleaner suitable for all street and off-road bikes, quads and ATV's. SILKOLENE WASH-OFF has been specially designed to rapidly remove all types of dirt from metals and plastics with minimum 'hands-off' effort. The latest detergent technology allows SILKOLENE WASH-OFF to clean unprotected aluminium alloy components without corrosive effects. Plastics, paint, rubber and glass surfaces can be cleaned again and again without deterioration or cracking. Apply neat with a hand pump-spray and finish off with FUCHS SILKOLENE PRO-PREP for that elusive, gleaming 'factory finish'.

SILKOLENE PRO WASH

This is a super effective environmentally aware biodegradable cleaner, specially developed for offroad motorcycles, street bikes and scooters. SILKOLENE PRO WASH removes dirt, grime and oily deposits with the minimum of effort - no need to scrub and polish! Simply spray your bike with SILKOLENE PRO WASH, then rinse off. For the ultimate, gleaming 'factory finish', allow your bike to dry after washing and then apply FUCHS SILKOLENE PRO PREP. SILKOLENE PRO WASH is really effective on all surfaces, including plastics and aluminium.

MAINTAIN

The information contained in this product information is based on the experience and know-how of FUCHS EUROPE SCHMIERSTOFFE GMBH in the development and manufacturing of lubricants and represents the current state-of-the-art. The performance of our products can be influenced by a series of factors, especially the specific use, the method of application, the operational environment, component pretreatment, possible external contamination, etc. For this reason, universally-valid statements about the function of our products are not possible. The information given in this product information represents general, non-binding guidelines. No warranty expressed or implied is given concerning the properties of the product or its suitability for any given application.

We therefore recommend that you consult a FUCHS EUROPE SCHMIERSTOFFE GMBH application engineer to discuss application conditions and the performance criteria of the products before the product is used. It is the responsibility of the user to test the functional suitability of the product and to use it with the corresponding care.

Our products undergo continuous improvement. We therefore retain the right to change our product program, the products, and their manufacturing processes as well as all details of our product information sheets at any time and without warning, unless otherwise provided in customer-specific agreements. With the publication of this product information, all previous editions cease to be valid.
